

Web51 Project

- commercial licence

Web51 is a complex project of connecting an Intel x51 compatible processor to a Realtek RTL8019AS network controller. The result is a very low-cost Ethernet interface. Since a well-known x51 architecture is used, even small and medium-scale businesses can now network their devices.

Web51 licensing strategy

We, the authors of the Web51 system, offer the following two versions:

- **Free version** - Covered by GNU GPL, available for download free of charge from <http://web51.hw-server.com> including source codes. However, some subroutines (such as RTL8019 control) are inside a library that is distributed in binary form only. Available are several versions of the library, differing by the configured number of simultaneous TCP connections supported.
- **Commercial version** - Includes all source codes of the project. It is not limited by GNU GPL. It is distributed together with our development system (our own assembler and linker). Available for purchase with the HW kit or separately.

Commercial version licence

The Web51 project is copyright (C) Radek Benedikt and HW server (the "Authors"). This License applies to all software included in the Web51 project, including the LIBK library. This is the so-called "commercial" license that gives you access to complete source code (including LIBK) but prohibits further distribution or disclosure of it. If you want to distribute the source code or any modifications thereof, you can either follow the terms of the GNU General Public License (does not apply to LIBK which, in this case, may be distributed in binary form only), or you must seek prior written permission from the Authors.

Licence conditions

- You may use the source code to develop a modified version of the Web51 software. By using we mean changing, compiling, porting to another language or target hardware, making copies for your own internal use.
- Out of such modified versions, you may distribute the compiled (executable) binary form, subject to a royalty described below, if the binary form is distributed as a firmware of your hardware product.
- Any distribution, sublicensing, copying, or other use of the source code, except as expressly permitted above, is prohibited.
- A royalty is requested for each unit of hardware, that is caused by you to incorporate portions of the Web51 project and/or modifications thereof in its firmware. The royalty has been set to \$1 (one U.S. Dollar) per unit of such hardware. Certain products and/or services sold by the Authors may include pre-paid royalty for a certain number of units of your hardware.

- **NO WARRANTY**

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

- **General**

This license agreement shall be governed by the law of the Czech Republic.
